

Built for Vehicle Surveillance Across African Transport Corridors

Rugged. Affordable. Always-On. Local.

For fleet operators, logistics providers, insurers, and mobile security companies deploying dashcams, driver-facing cameras, cargo monitoring, or push-to-talk (PTT) devices, floLIVE and CommsCloud deliver resilient, high-uptime cellular connectivity, engineered for the realities of Africa's roadways.

From remote mining routes to high-volume corridors, our solution ensures your systems stay online across borders, terrain, and time zones.

Seamless Coverage Across Every Route

- **Multi-network SIMs:** Auto-connect to the strongest signal — no roaming gaps
- **Borderless handovers:** Continuous operation between countries
- **Zero-downtime failover:** Instant switching for uninterrupted video transmission
- **Remote to urban:** Coverage from cities to deep field operations
- **Optimized for moving fleets:** no SIM swaps, no signal loss

Your cameras stay connected — from the capital to the corridor.

Always-On Connectivity for Video-Driven Operations

Whether you use event-based video, live streaming, or real-time telematics, we deliver:

- Persistent connectivity with backup networks built-in
- No interruptions during uploads, alerts, or live views
- Remote SIM provisioning, diagnostics & usage control
- Designed for Africa's mobile networks and environmental challenges

24/7 uptime — even when the roads aren't smooth.

Flexible Plans for Real Deployments

Save up to 70% with the best pricing in the market.

Our plans are built for modern fleet operations — affordable, scalable, and stress-free.

- **300MB** — Perfect for push-to-talk, low resolution cameras, or backup comms
- **1GB** — Ideal for event-triggered video, driver alerts & diagnostics
- **3GB+** — Built for multi-cam systems, HD footage & live feeds

- **Up to 70% savings** vs. roaming or legacy MNO plans
- **No overages** — fixed monthly pricing
- **Month-to-month flexibility** — no lock-ins

Africa-ready. CFO-approved.

Improve Safety, Security & Fleet Efficiency

- Document incidents with **real-time video evidence**
- Reduce disputes and accelerate insurance resolution
- Monitor driver behavior for **safety compliance**
- Protect cargo with **tamper alerts and surveillance feeds**

Visibility = Accountability.

Trusted by Fleets Across Africa

When your fleet crosses borders and your cameras can't afford downtime, you need:

- A **network built for transport realities**, not just cities
- **In-country expertise** for fast deployment, SIM management, and support
- **Pan-African SIM coverage** that works from port to inland
- **Transparent pricing** with no long-term lock-ins
- **24/7/365 live support** from regional experts who understand your terrain

Where We're Live Today

We currently support fleets in:

South Africa, Namibia, DRC, Zimbabwe, Tanzania, Zambia, Botswana, Mozambique, Kenya, Uganda, Lesotho, Eswatini, Malawi, Madagascar, Rwanda

And we're adding more every month.

If your camera is your evidence - your connection is your lifeline.
Let's make sure it never drops.

Let's talk deployment today.

About floLIVE

floLIVE delivers unmatched IoT connectivity by owning and operating the world's largest cellular network, ensuring seamless, secure global coverage. With a carrier-grade, distributed core network and over 40 local points of presence, floLIVE optimizes IoT performance with low latency, end-to-end security, and compliance. Its innovative platform, featuring multi-IMSI SIM solutions, simplifies IoT operations with single SIM and single SKU capabilities. Backed by leading tech investors, floLIVE empowers partners to scale IoT solutions effortlessly while driving better business outcomes. Offering 24/7 support and exceptional customer satisfaction, floLIVE is transforming IoT connectivity for a smarter, more connected world.
